# 'Ademgenoot'

a serious game to motivate and empower asthma patients to adhere to their maintenance medication

Charlotte Poot, MSc | junior researcher

Jasmijn de Boer | design graduate student

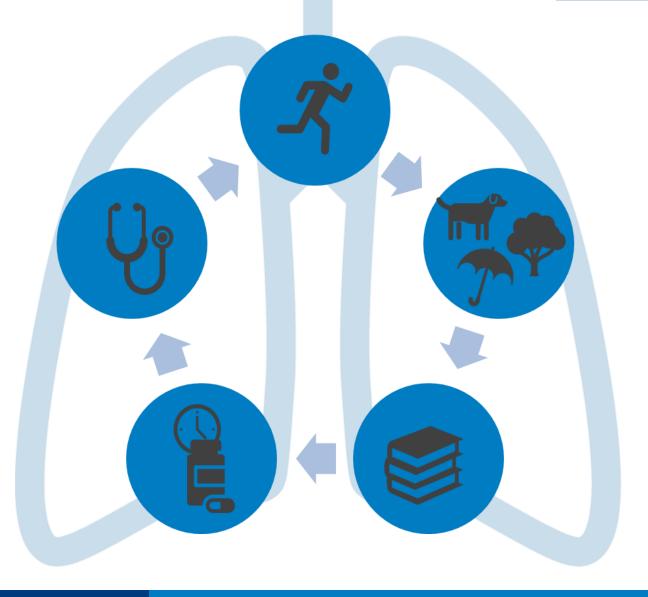

## **Disclosure**

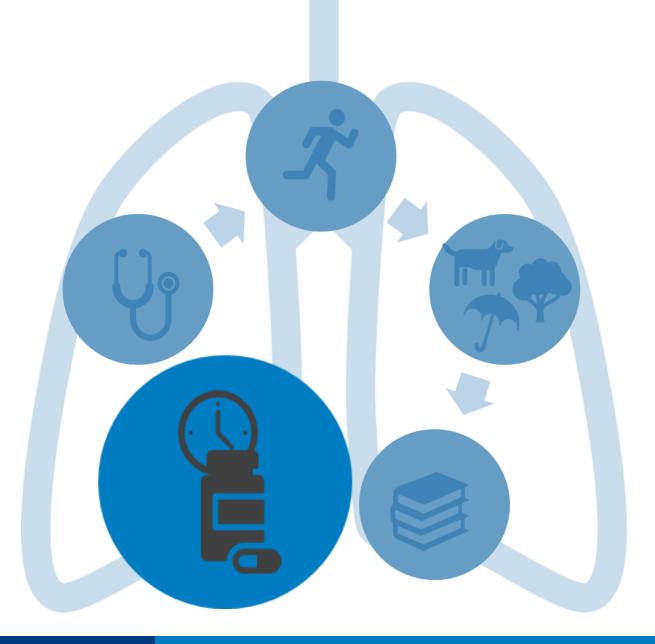

This study is funded by AstraZeneca.

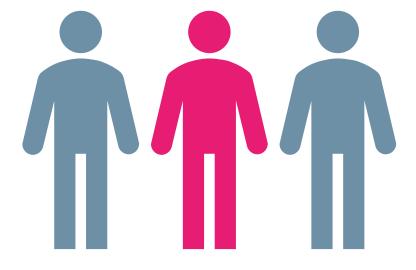

The institutions of Prof. Niels Chavannes and Prof. Janwillem Kocks received consultancy fees from AstraZeneca for the research on Turbu+™.

All other authors declare that they have no competing interests.

# **Asthma self-management**

1/3

Show poor medication adherence

Waverijn, G., Spreeuwenberg, P., & Heijmans, M. (2014). Monitor zorg en leefsituatie van mensen met astma of COPD. Kerngegevens en Trends. Rapportage.

### Non-adherence phenotypes

The disadvantages outweigh the advantages I forget... I don't understand the specifics **Erratic Unwitting** Intelligent Lack of ability Lack of knowledge **Lack of motivation** 

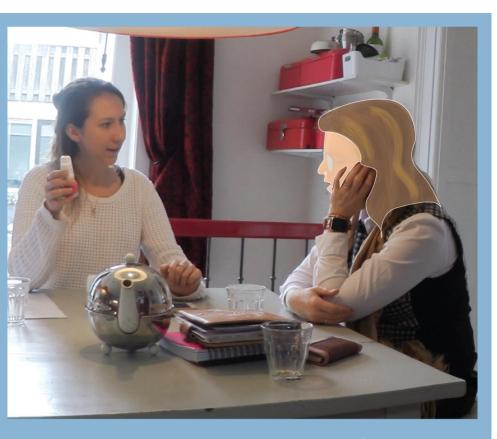

# **Study Objective**

...development of a proof of concept for an asthma self-management eHealth intervention that **motivates patients** to adhere to their medication.

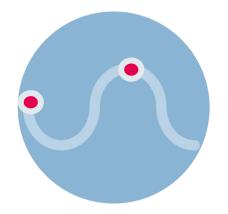

**Intelligent**Lack of motivation

#### Field research

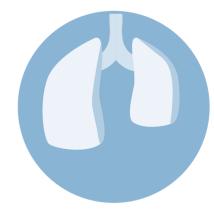

IN-DEPTH INTERVIEWS
people with asthma (n=12)
Health care professionals (n=4)

Feels episodic

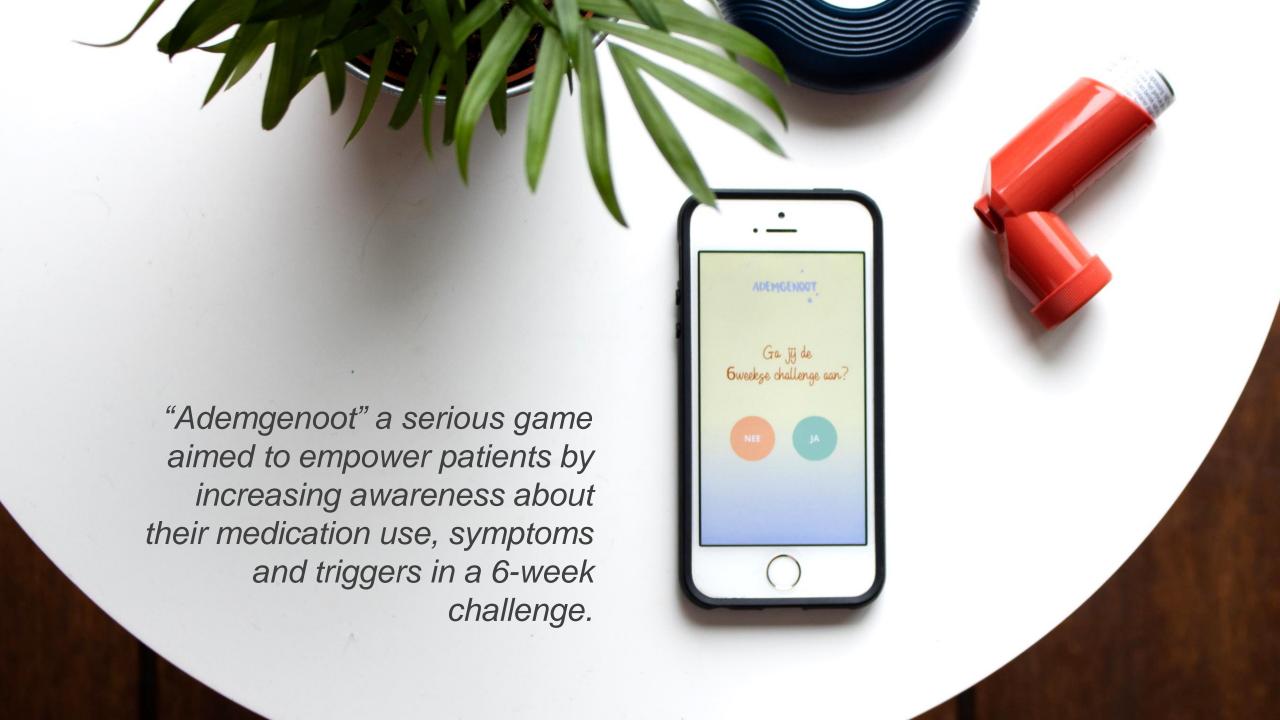

Feeling well no meds

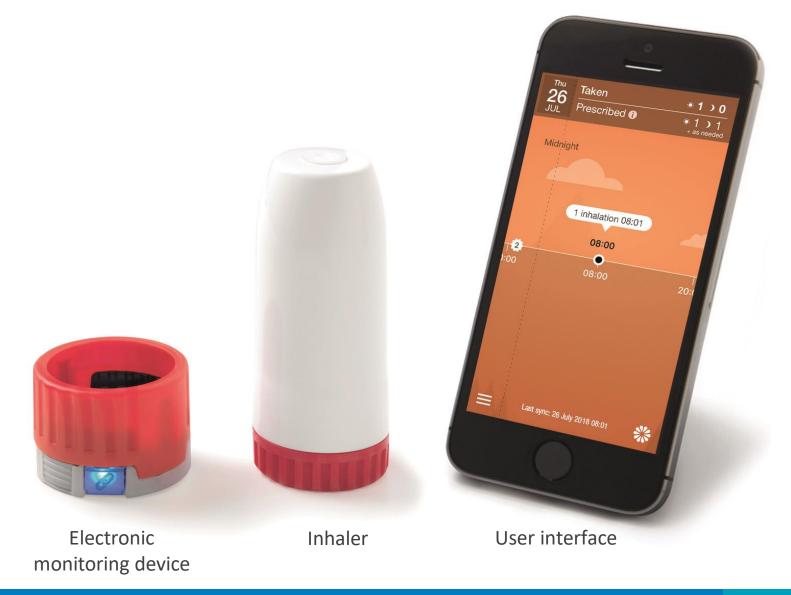

Used to limited lung capacity

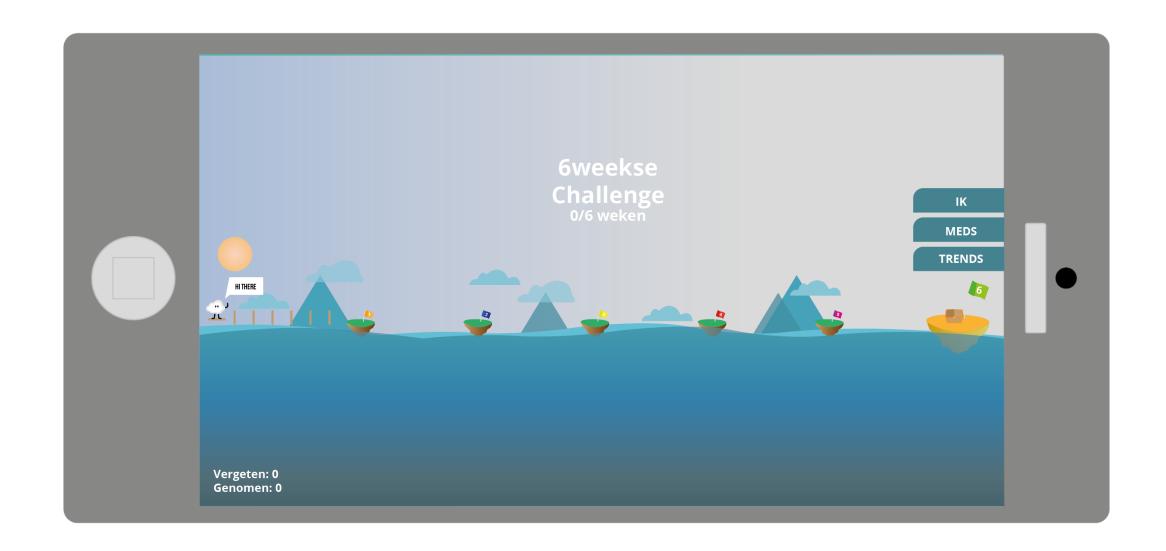

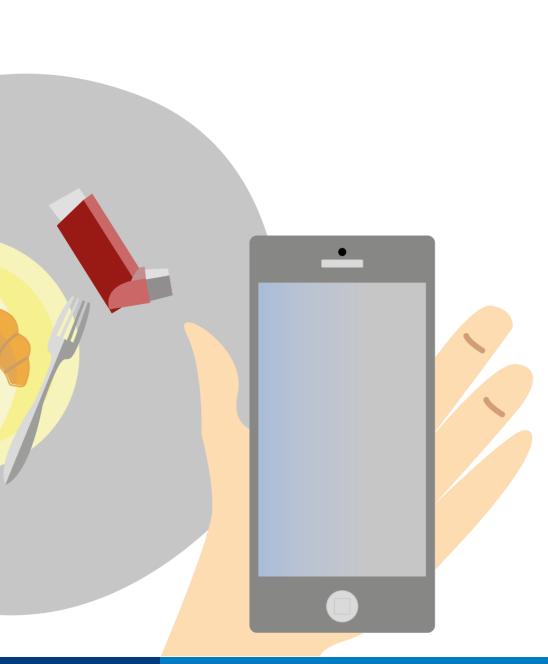

Lack of experience effect

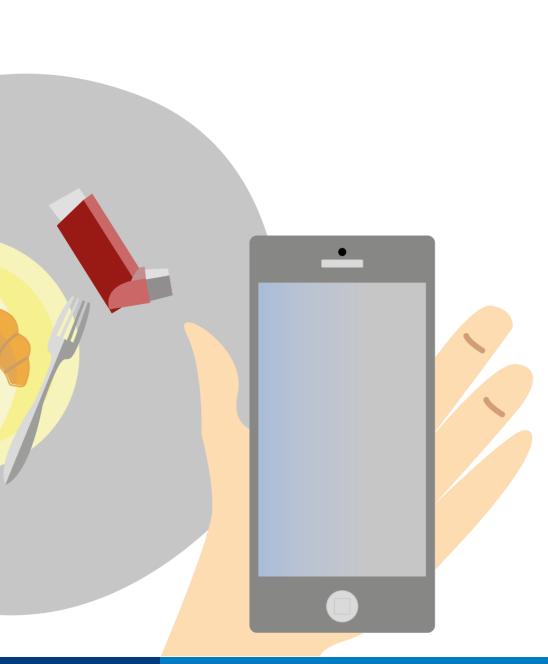

### A smart asthma inhaler

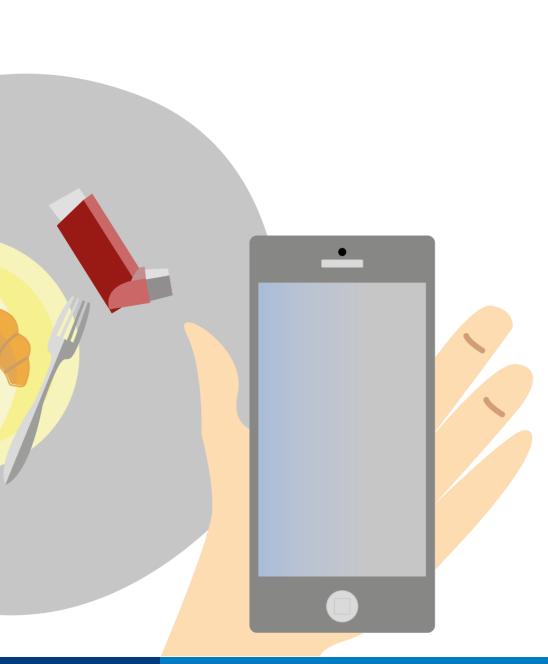

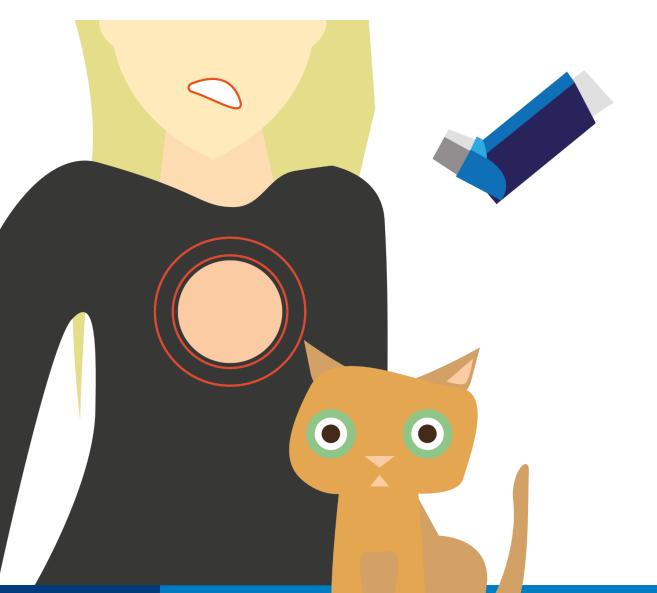

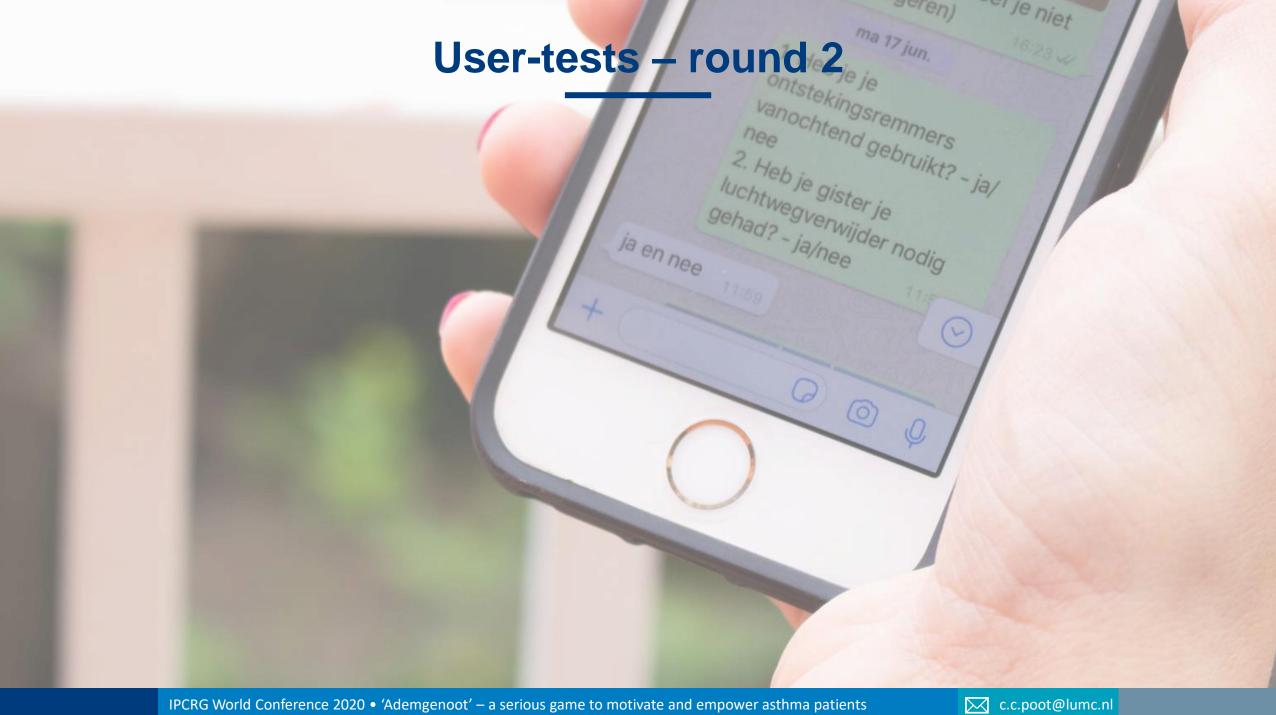

#### **User-tests: round 1**

# **Key-take aways**

Motivated by storyline and creation of a habit

Direct feedback and insight into trigger moments

Experience that one can do better

Personal goal and commitment

Rewards
