

10th IPCRG WORLD CONFERENCE DUBLIN 2021 Breathing & Living Well

IPCRG Research Prioritisation

Arwa Abdel-Aal Rachel Jordan

Determining respiratory primary care research Free work locally collaborate g priorities

- To understand which research questions concerns most primary care healthcare professionals
- To better address an often undervalued disease area, with a focus on improving practice
- To reduce the **7.7 million deaths** per year that respiratory conditions account for
- To improve clinical guidelines and patient care globally.
- Update of 2012 prioritisation

Methods: e-Delphi process

- 608 questions
- from 112

 community based physicians,
 nurses and other
 healthcare
 professionals
- representing 27 high, middle and low-income countries
- 27 academic experts reduced these to 176 questions using an e-Delphi process

Characteristics of respondents

Demographic	Туре	Number of participants of 112 (%)
Gender	Male	47 (42.0)
	Female	65 (58.0)
Age	25-34	28 (25.0)
	35-44	36 (32.1)
	45-54	26 (23.2)
	55-and over	22 (19.7)
Role	Doctor	93 (83%)
	Nurse	11 (9.9%)
	Other Healthcare Worker	8 (7.1%)
Years of Experience	< 5 years	22 (19.6)
	5 - 10 years	24 (21.5)
	> 10 years	66 (58.9)
Work Setting	Hospital	26 (23.2%)
	Primary Care/ Community	74 (66.1%)
	Other	12 (10.7%)
Region	Africa	14 (12.5%)
	Asia	37 (33.0%)
	Europe	46 (41.1%)
	North America	3 (2.7%)
	Oceania	3 (2.7%)
	South America	9 (8.0%)
Country Classification*	High-income	45 (40.2%)
	Middle-income	58 (51.8%)
	Low-income	9 (8.0%)

Final research questions by topic (%)

The most frequent questions were related to COPD Management and Asthma selfmanagement

COPD Management 43,0	Other respiratory-	Asthma Management and Prognosis 14,0	COPD diagnosis and screening 12,0		TB in Primary Care 12,0		
	Asthma Self- management 18,0	Tobacco Control	Asthn Diagnosi Screen 8,0	na s and ing	COPD Prognosis 8,0		
		11,0 COPD Self-	Allergic Rhinitis and		Infections in Primary Care		
		management and Pulmonary Rehabilitation 9,0	Other Allergic Condition S 6,0	Sleep Apnoe 6,0	5,0 Lung cancer in Primary Care 4,0		

49 questions reached 80% consensus for importance after e-Delphi rating stages Top 10 ranked questions

Question	Consensus
What is the best way to manage chronic/ persistent cough in primary care?	100%
What are the best ways to monitor asthma in primary care?	100%
What steps could be taken to prevent exacerbations and progression of asthma?	97.1%
How can brief advice be better used to increase motivation to quit tobacco use, and what elements are most efficient for a busy primary care practitioner?	97.1%
How should we best manage COPD in patients with cardiovascular diseases, arrhythmias and uncontrolled hypertension?	97%
What are the most effective strategies for ensuring sustained good inhaler techniques among asthma patients?	94.2%
What methods could be used to enhance the use of asthma controller therapy?	94.1%
How could we improve COPD 'patients' use of inhalers? What are the best ways to teach people and how can we apply them in daily clinical practice?	94.1%
What is the best way to engage people with asthma in self-management?	94.1%
How can we best educate healthcare professionals to improve early recognition and diagnosis of COPD?	94.1%

Cross cutting themes from qualitative content analysis

New topics and continued priorities

New topics

- Research about shared and multidisciplinary care
- Greater understanding about the role of inhaled corticosteroids in management of COPD and asthma

Continued priorities

- The need for simple and accessible tools and tests
- Improvement of patient self-management skills
- Promoting smoking cessation in primary care settings
- Managing people with multimorbidity
- Training and education of primary care professionals

What next?

- These priorities should **guide policy decisions** and support respiratory primary care research
- They should inform the research agenda for the coming 5-8 years
- They highlight new opportunities and continuing challenges
- **COVID-19** may permanently change how we deliver healthcare. Aspects like remote consultation need more attention
