

PROGRAMME

Sunday - May 14th, 2023					
Time	Stuttgart Hall	München room	Wurzburg room	Darmstadt room	
13:00-14:00	Research School Registration in Foyer		Research school organisers meeting/mentors briefing		
14:00-16:00				Scientific Meeting Organisers pre-meet	
16:00-18:00		Education sub-committee meeting	Research School Session 1	Research Leadership Team meeting (16.30-18.30)	
18:00-19:00	Welcome gathering in bar				
19:00	Research School and pre-meetings dinner at 19:00 in restaurant				

PROGRAMME

Monday - May 15th, 2023					
Time	Stuttgart Hall	München room	Wurzburg room	Darmstadt room	ULM Hall
08:30-08:55	Registration – Ulm (exhibition and coffee space)				
09:00-10:35	<p>Welcome address: Ee Ming Khoo (IPCRG President)</p> <ul style="list-style-type: none"> - Scientific meeting aims and IPCRG's research strategy: Janwillem Kocks - German primary care and research: overview and future: Antonius Schneider - IPCRG as an active research partner (Charlotte Hoffman, Rachel Jordan, Ee Ming Khoo) - New opportunities to get involved: Siân Williams 				
10:40-10:50	Coffee Break & Exhibition				
10:55-12:00	<p>Session 2: Developing primary care respiratory research</p> <p>What the world of respiratory research looks like: Janwillem Kocks</p> <p>Building primary care research careers: Hanna Sandelowsky</p> <p>Research competences: Job van Boven</p> <p>Becoming involved in research, where research grants can lead to: Cristina Isar</p>		Spirometry Simplified meeting	Research School Session 2 - Part 1	
12:05-13:15	Lunch Break & Exhibition				
13:15-14:30	<p>Oral Presentations Session 1: Asthma</p> <ol style="list-style-type: none"> 1. IMpLeMenting IMpROved Asthma self-management as RouTine (IMP2ART) in primary care: internal pilot for a cluster randomised controlled trial, Kirstie McClatchey 2. Randomized control trial of integrated community health worker services and primary care practices for Low-Income people with asthma, James Stout 3. Make every puff count - The Impact of different Valved Holding Chambers (VHCs) on Carbon Footprint of MDIs, Jem Patel 4. Understanding and influencing primary care professionals' perceptions of asthma management in Greece: Using the Asthma Right Care programme, Ioanna Tsiligianni 	<p>Oral Presentations Session 2: COPD</p> <ol style="list-style-type: none"> 1. High use of short-acting beta-2-agonists in COPD is associated with an increased risk of exacerbations and mortality, Hanna Sandelowsky 2. Management of Chronic Obstructive Pulmonary Disease in Primary Health Care – Evaluation of family physician's perceptions about usual care, Pedro Fonte 3. Depression and anxiety in COPD – prevalence and patient characteristics in Sweden, Therese Öfverholm 4. The influence of mixing inhaler devices on inhaler technique in COPD, Lars Dijk 	<p>Oral presentations; Conversation Café 1: Integrating multiple perspectives in primary care</p> <ol style="list-style-type: none"> 1. "I want to know what to expect; even though it's not pleasant. I want to know what's going to happen and how to handle it when it does." The views of patients and carers on best care for people with COPD: an interview study, Ann Hutchinson 2. Video resources for people with Chronic Obstructive Pulmonary Disease: An exploratory qualitative study, Kirsti Loughran 3. Perceptions on chronic respiratory diseases as predictors of respiratory risk behaviours in rural Crete, Greece: an observational FRESH AIR study, Marilena Anastasaki 4. Building a diagnostic picture of asthma in primary care: Development of a novel 'jigsaw puzzle' approach, Siân Williams/Dermot Ryan 	Research School Session 2 - Part 2	
14:35-15:50	<p>Oral Presentations Session 3: Diagnosis approaches in primary care</p> <ol style="list-style-type: none"> 1. Characterisation of existing COPD diagnoses in the Health Centre Group of Braga (Portugal) Pedro Fonte 2. CRP POCT test for diagnosis of respiratory infections in children in Kyrgyzstan: the randomised controlled clinical trial, Elvira Isaeva 3. The acceptability of an asthma diagnosis clinical decision support system to primary care clinicians, Luke Daines 4. Prediction rule using FeNO and symptoms for diagnosing asthma, Benjamin Brunn 	<p>Oral Presentations Session 4: Spirometry in primary care</p> <ol style="list-style-type: none"> 1. Feasibility, quality and added value of unsupervised at-home spirometry in primary care, Merijn Driessen-Roelfszema 2. The landscape of spirometry services in England and the potential for Artificial Intelligence decision support software in primary care; a qualitative study, Gillian Doe 3. Belgian General Practitioners' perspectives on the use of spirometry in primary care: a qualitative study, Camille Vanhecke 	<p>Oral presentations; Conversation Café 2: Service development, evaluation and prevention services</p> <ol style="list-style-type: none"> 1. Evaluation of stakeholder engagement in global health research: Lessons learnt from the RESPIRE programme in Bangladesh, India, Malaysia, and Pakistan Nathan, Jayakayatri Jeevajothi 2. Providing evidence based answers to first hand COVID and respiratory questions from the IPCRG Sentinel Network of practising primary care clinicians: A novel service report, Alan Kaplan/Neil Fitch 3. Knowledge and Attitudes of Kyrgyz physicians towards Sleep Medicine: results of the SMAKK survey, Azat Bolotbek Uulu 		
15:55-16:25	Coffee & Abstract viewing & Exhibition			Spirometry Simplified filming	Exhibition
16:30-17:45	<p>Session 3: Device workshop</p> <ol style="list-style-type: none"> 1. Panel discussion: Potential and key developments in respiratory testing devices 2. Practical presentations: <ul style="list-style-type: none"> - Vitalograph - Niox - CAIRE Diagnostics 	<p>Oral Presentations Session 5: Breathlessness Session</p> <ol style="list-style-type: none"> 1. Improving the diagnosis of breathlessness in primary care: development and implementation of the "Breathlessness diagnostics in a Box" (BiaB), Janwillem Kocks 2. The language COPD patients use to describe exacerbations: findings from an interview study, Ann Hutchinson 3. Hyperventilation syndrome in patients with prolonged dyspnea after a mild COVID-19 infection, Henning Stenberg 4. Investigating a structured diagnostic pathway for chronic breathlessness in primary care: a feasibility cluster Randomised Controlled Trial, Gillian Doe 	<p>Oral presentations; Conversation Café 3: Detection and screening tools in primary care</p> <ol style="list-style-type: none"> 1. Pilot lung screening in Scotland: intervention development and interim findings, David Weller 2. Timely detection of chronic obstructive pulmonary disease in primary health care, Pedro Fonte 3. Screening tools for work-related asthma and their diagnostic accuracy: a systematic review, Ngamjit Kongsupon 4. How to successfully design and implement sustainable, evidence-based prevention packages targeting tobacco use and air pollution exposure in adolescents in disadvantaged populations? Charlotte Hoffman 5. A screening and early warning system for COPD with OSA based on the Medical Internet of Things in healthcare: a prospective multicenter observational cohort study (protocol), Zihao Pan 	Spirometry Simplified filming	
17:50-19.00		Asthma Right Care meeting	COPD Right Care meeting	Spirometry Simplified filming	
19.00	Conference dinner (venue tba)				

PROGRAMME

Tuesday - May 16th, 2023					
Time	Stuttgart Hall	München room	Wurzburg room	Darmstadt room	ULM Hall
08:30-08:55	Coffee & Abstract viewing & Exhibition			Research School Activity <u>Mentors:</u> Alice Malpass (UK), Tracey Stone (UK), Amanda Farley (UK)	Exhibition
09:00-10:15	<p>Oral Presentations Session 6: Digital health applications in primary care</p> <ol style="list-style-type: none"> 1. Identifying long COVID using coded data and free text entries from primary care health records in Scotland, Luke Daines 2. Asynchronous digital health interventions (aDHI) for reviewing asthma: a mixed-methods systematic review, Nazim Uzzaman 3. Can AI-based decision support software help to use spirometry more consistently in primary care? Camille Vanhecke 4. Access to health care is a human right: a focus group study in COPD patients regarding eHealth accessibility, Esther Metting 	Spirometry Simplified meeting	<p>Oral presentations; Conversation Café 4: Research ideas</p> <ol style="list-style-type: none"> 1. Performing high-quality situational analysis into the burden of tobacco and air pollution exposure among adolescents in disadvantaged populations, Charlotte Hoffman 2. Exacerbations in COPD patients with comorbid depression and anxiety, Therese Överholm 3. What is the effect of vitamin D supplementation on exacerbation rate in vitamin D-deficient patients with COPD? Linda Costa 4. The diagnostic test accuracy of oscillometry for diagnosing airway obstruction, Alexey Fomenko 5. Does over-reliance on montelukast affect the implementation of the "Asthma Right Care (ARC)" movement in Bangladesh? Sadia Sultana 	Breathlessness Workshop - by invitation	
10:20-10:55	Coffee & Abstract viewing & Exhibition				Exhibition
11:00-12:15	<p>Oral Presentations Session 7: Infection, and health tools in primary care</p> <ol style="list-style-type: none"> 1. Evaluating a mobile health tool to guide management of acute respiratory illnesses in young children in Uganda, James Stout 2. Systematic review of the efficacy of ivy leaf (<i>Hedera helix</i>) in acute upper respiratory tract infections: an update. Elizabeth Sierocinski 3. Evaluating usability of the Reliever Reliance Test as a patient support tool in community pharmacy in England, Darush Attar-Zadeh 4. Development of theoretically informed audit and feedback to improve asthma self-management in UK primary care, Kirstie McClatchey 	<p>Oral Presentations Session 8: Pulmonary Rehabilitation in primary care</p> <ol style="list-style-type: none"> 1. General practitioner's referencing habits to pulmonary rehabilitation, Liliana Silva 2. Community-based physical activity for COPD patients with varying needs in Brazil (BWZ) by the Breathe Well group, Sonia Martins 3. Pulmonary Rehabilitation program for COPD – Findings from the EXpiRA+ Pilot Study, Cláudia Bulhões 	<p>Oral presentations; Conversation Café 5: The value of tools in practice</p> <ol style="list-style-type: none"> 1. Feasibility of the Munich Asthma Questionnaire to assess symptom control in asthma patients of primary care, Stefanie Eck 2. A systematic review about the possible role of learning theories in the development of a new educational model for inhalation technique in patients with asthma or COPD, Lars Dijk 3. Exploring the use of asynchronous consultations for reviewing asthma in primary care from the perspective of patients, healthcare professionals and organisations, Nazim Uzzaman 4. The acceptability and feasibility of CRP POCT test for respiratory diagnosis in children in Kyrgyzstan: the qualitative study, Azamat Akyzbekov 5. Multidisciplinary tuberculosis care: leveraging the role of hospital pharmacists, Deni Iskandar 	Athens SPC meeting	
12:20-13:35	<p>Closing Plenary</p> <p>Top 4 clinical and service development abstract presentations and award Summary and closing comments.</p>				
13:35-14:40	Lunch Break & Exhibition				Exhibition
14.40	Site visit to the practice of Lung specialist Dr Powitz at 14.00 and 15.00 (one hour, 5 people each time)
